Introduction to Probability, Statistics and Data Handling	Basic Definition and Concepts
Tutorial 1	

Subjects for discussion:

- 1. What is the role of *statistics*?
- 2. What is meant by the terms: *population*, *sample*? Give examples.
- 3. What is a random *experiment*, *outcome*, *sample space*, *event*? Describe.
- 4. How would like to measure the *probability* of an event?
- 1. A fair coin is tossed three times.
 - a) define the population and construct a sample space, how many outcomes are possible?
 - b) find a probability that at least one head will appear,
 - c) define:
 - two outcomes that are mutually exclusive,
 - two outcomes and find the sum of them,
 - two outcomes with non-zero intersection;
 - d) calculate the probability that:
 - the coin lands heads more often than tails,
 - the coin lands heads at least twice.
 - the coin lands heads on the last toss.
- 2. We have 10 students in our group. Four of them learn Spanish (event *A*), two German (*B*), and one German and Spanish. Are *A* and *B* independent?
- 3. The table describes the distribution of a random sample S of 100 individuals, organized by gender and whether they are right- or left-handed. Let's denote the events M = the subject is male, F = the subject is female, R = the subject is right-handed, L = the subject is left-handed. Compute the following probabilities:

R

43

44

Males

Females

9

4

- a. P(M)
- b. P(F)
- c. P(R)
- d. P(L)
- e. P(MANDR)
- f. P(FAND L)
- g. P(MOR F)
- h. P(MOR R)
- i. P(FOR L)
- j. P(M')
- k. P(R|M)
- I. P(F|L)
- P(L|F)
- 4. Carlos plays college soccer. He makes a goal 65% of the time he shoots. Carlos is going to attempt two goals in a row in the next game. A = the event Carlos is successful on his first attempt. P(A) = 0.65. B = the event Carlos is successful on his second attempt. P(B) = 0.65. Carlos tends to shoot in streaks. The probability that he makes the second goal **GIVEN** that he made the first goal is 0.90.
 - a) What is the probability that he makes both goals?
 - b) What is the probability that Carlos makes either the first goal or the second goal?
 - c) Are A and B independent?
 - d) Are A and B mutually exclusive?
